

Grease**AUTOL MEHRZWECKFETT**

K 2 K-30

Standard multi-purpose grease on lithium soap for rolling and plain bearings.

Physical Properties:

Soap base		Li-12-Hydroxystearate
Usage temperature range	°C	-30 till +120
Dropping point	°C	180
Base oil viscosity 40°C	mm ² /s	110
Behavior towards water		1-90
Anti-corrosion properties (EMCOR-test)		Corr.-grad. 0

AUTOL MEHRZWECKFETT is made from carefully tested and selected raw materials that are supplemented with special additives. It is natural colored fat with a supple consistency and smooth texture.

AUTOL MEHRZWECKFETT is particularly resistant to flexing, corrosion and oxidation.

Modern manufacturing processes, ongoing controls of raw materials and operational monitoring of process technology ensure consistent quality.

Possible field of application:

AUTOL MEHRZWECKFETT is suitable for the lubrication of rolling and plain bearings and other lubrication points depending on the operating temperature range. The main areas of application are lubrication points on vehicles, agricultural and construction machinery. It is suitable for use in automatic lubricating devices.

When selecting products, the manufacturer's instructions must be observed.
