

Eni Mix 2T

Eni Mix 2T is a semi-synthetic lubricant developed for 2-stroke engines of scooters and motorcycles, air or liquid cooled. According to the type of engine, the product can be manually mixed into fuel tank or used in the self-mixing lubricating system.

Characteristics (typical values):

Eni Mix 2T	Unit	method
Colour	-	red
Kin. viscosity	at 40°C	62
	at 100°C	9,0
Viscosity index		121
Density at 15°C	kg/m ³	871
Flash point	°C	111
Pourpoint	°C	-28

Properties and Performance:

- ⇒ **Eni Mix 2T** is formulated using a low ash additive that minimizes combustion chamber deposits, spark plug fouling and exhaust port blockage. It also minimizes varnish formation and carbon deposits and thus prevents piston ring sticking.
- ⇒ **Eni Mix 2T** reduces rust and corrosion in the engine caused by burns, moisture and acids.

Applications:

Eni Mix 2T is suitable for use with mixed and separate lubrication in scooters and motorcycles with normal loads.

Mixing table:

Mixing ratio	1:25	1:33	1:40	1:50	1:100
Liters petrol per 1 liter Eni Mix 2T	23	30	36	45	90
