

# Eni i-care superclean summer ready to use

**Eni i-care superclean summer ready to use** is a cleaning agent for use in windscreen washer systems. It dissolves silicone oil and dirt from insects on the lens, with active ingredients providing a clear view in seconds.

**Eni i-care superclean summer ready to use** can also be used in the household – for example for cleaning mirrors, glass doors, tiles, etc. Simply spray on and leave to work. Then rub dry with a clean cloth or paper towel. The glass surfaces are spotless and have no disturbing light reflections.

**Eni i-care superclean summer ready to use** is antistatic and hard water resistant. Protects paintwork, rubber and plastic parts. Also suitable for vehicles with polycarbonate windows and fan nozzles. The washing-active substances used are easily biodegradable.

## Physical properties (typical values):

| Eni i-care superclean summer ready to use | Unit              | Value              |
|---|-------------------|--------------------|
| Odor                                      | -                 | like citrus fruits |
| Colour                                    | -                 | yellow             |
| Density at 20°C                           | g/cm <sup>3</sup> | ca. 1,0            |
| Water solubility                          | -                 | miscible           |
| pH at 20°C                                | -                 | 8                  |
